Reinhardt van der Walt

55810608

Ever since I was a kid, I've been dismantling hardware (laptops and Xbox controllers) to see what makes it tick.

I'm naturally curious and passionate about understanding how technologies work.

This 'R' is represented by the connections of nodes on a motherboard.

It symbolizes the connection between my past, present, and future. Showing how everything connect to one another.

I value family, equality and sportsmanship.

Doing my work with accuracy and consistency makes me feel like I'm doing the best work that I possibly can, making myself proud.

I am working towards finishing my degree with honour and getting an internship at a big tech company. Learning how IT is used and incorporated in the real industrial world.

CMPG 214 Repository

My roll selected for assignment 2 is Web Developer.

The hardest for me was designing the infographic. I kept asking myself, simple or detailed? I chose simple. Looking at the final result, it actually reflects who I am. I'm not someone that seeks attention or overcomplicates things. The simplicity and accuracy of the work speaks for itself in my opinion. I removed a lot of information from the answers. If something wasn't essential, it was gone. What remained was the truth, the things I want people to know about me when they first meet me or read my work. Less is more, and that is enough.

My logo as seen above:
